

# Introduction

In a universe where memes rule emotions and cryptocurrencies, a mythical figure emerges: **Dogeto, the God of Dogs Meme Coins.**

Dogeto is not just a coin; it is a symbol of good fortune and unity in the crypto world. Having Dogeto in your portfolio will not only bring fun, but also prosperity, boosting your other meme coins to new heights.

## WTF is Dogetocoin ?

It is a peer to peer digital currency favored by having as followers all the meme dogs of the world, its goal is to make people laugh, give fortune with its amulet and attract good people.

HE IS THE DADDY OF ALL ALL OF THEM

# The Blockchain Ecosystem

The heart of the Dogeto engine:

**Dex:** A decentralized system to exchange your tokens quickly and safely.

**for developers:** Join our active community and be part of the exponential growth of Dogeto.

**Block Explorer:** A web interface that allows you to view the different operations carried out in the Dogeto ecosystem for complete transparency in all processes.

**Incentives for promoters:** Automatic and instant earnings in usdt and eth in your wallet for promoting the project cto through a 5% commission on each users purchase in the pre-sale.

**Bridge:** Interconnects the different networks through our technological bridges made with the best infrastructure.

# Ethereum Layer 2

## What is Layer 2?

Layer 2 refers to a secondary framework or protocol built on top of an existing blockchain (Layer 1), such as Ethereum. This secondary layer improves the scalability, speed, and efficiency of the primary blockchain, allowing it to handle a higher volume of transactions at a lower cost.

## What is Layer 2?

Layer 1 blockchains, such as Ethereum, can suffer from congestion, resulting in slower transaction speeds and higher fees. Layer 2 solutions address these issues by processing transactions off of the main Ethereum chain, reducing the load and allowing for faster, cheaper transactions.

## Benefits of Layer 2 for Dogeto:

1. You will have a staking system, you will earn Dogeto for staking in 3 terms: 7 days, 30 days and 90 days, you can withdraw your Dogetos whenever you want, the stake will be available on the platform by launching the Dogeto token on centralized and defi exchanges.
2. Higher speed: Transactions on layer 2 are processed much faster than on layer 1. This means you can stake, trade and interact with Dogeto at lightning speed.
3. Lower fees: With fewer transactions congesting the Ethereum mainnet, gas fees are substantially lower on layer 2.

# Road Map

The token distribution for Dogeto is designed to support growth, sustainability, and community rewards:

## Phase 1: Genesis

- Creation of the smart contract on Ethereum.
- Initial Dogeto presale and activation of social networks.
- First designs and narratives of the Dogeverse.

## Phase 2: Expansion

- Listing on important centralized exchanges.
- Staking to reward Dogetero holders.
- Collaborations with artists and influencers.

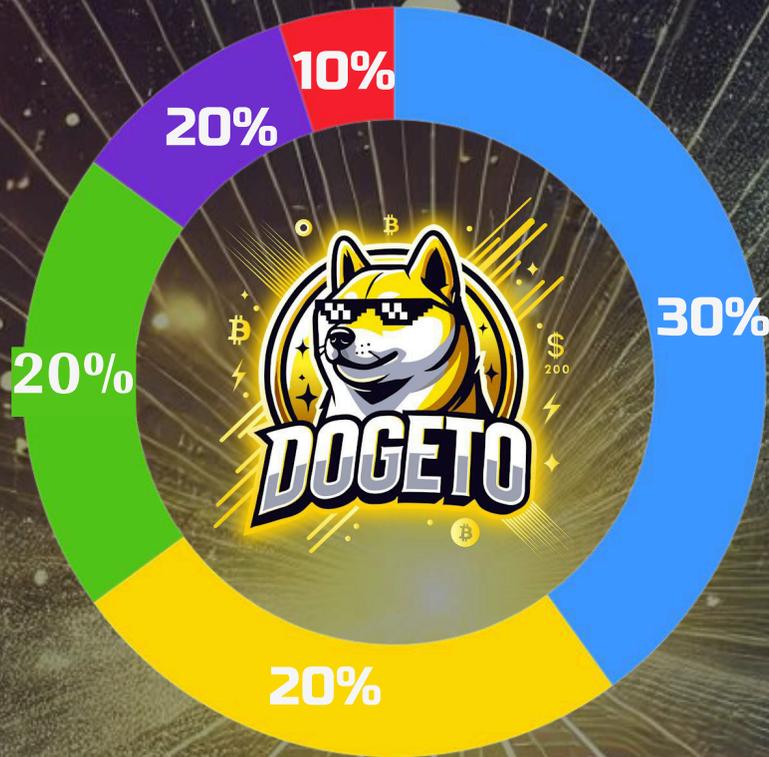

## Phase 3: Dominance

- Listing on important centralized exchanges.
- Staking to reward Dogetero holders.
- Collaborations with artists and influencers.

# Tokenomics

The token distribution for Dogeto is designed to support growth, sustainability, and community rewards:

- **Pre-sale:** 30% of the total supply will be allocated to the pre-sale phase, ensuring sufficient liquidity and staking to power the project.
- **Staking:** 20% of the total supply will be reserved for staking rewards, incentivizing long-term holders and fostering a stable ecosystem.
- **Marketing:** 20% will be dedicated to marketing efforts, including influencer partnerships, social media promotions, and broader campaigns to drive mass adoption.
- **Project Development:** 10% will be allocated to the ongoing development of the project, ensuring Pepeto continues to evolve and improve after launch.
- **Liquidity:** 20% will be reserved to maintain healthy liquidity on exchanges, ensuring smooth trading and stability.

# Conclusion

## How to Start Buying Dogeto “The Dog God Meme Coin”
